SUMMARY

Software Engineer with 4+ years of experience building and scaling modern web applications across the React ecosystem. Proven track record of evolving from Frontend to Fullstack Engineer, delivering end-to-end solutions using Next.js, React.js, Go (Golang), and relational databases. Experienced in designing and implementing APIs, backend business logic, and database migrations to support scalable product growth. Strong focus on performance, system reliability, and engineering excellence within cross-functional, fast-paced teams.

CAREER HIGHLIGHTS

- Transitioned from Frontend to Fullstack Developer, expanding scope into backend development and system design.
- Built and maintained full-stack applications using Next.js, React.js, Go (Golang), and relational databases.
- Developed RESTful APIs, implemented backend business logic, and managed database schema migrations for scalable features.
- Collaborated with cross-functional teams and improved application performance, stability, and maintainability in production environments.

WORK EXPERIENCES

Reku.id

Software Developer (Full stack)

Dec 2025 – Present
